MEMORANDUM FOR: IHC Members  
FROM:   
Chairman  
SUBJECT: Security Labeling

STAT

1. Attached for your review is an outline report on automated labeling of machine processed data prepared by  as part of the DCI's COMPUSEC Project.  will speak on the labeling issue and participate in Committee discussion at an IHC meeting to be held Wednesday, 22 May 1985 at 0945. A complete agenda will be provided by separate correspondence.

STAT

2. The need for labeling automated data base elements to meet computer security requirements has potential operational and resource management implications of great significance. It is important, therefore, that the techniques and procedures ultimately adopted by the Community adequately reflect the needs and constraints of its constituent agencies. IHC will serve as a forum for this purpose, specifically to support eventual policy determinations in this area by the DCI and DDCI.
